

Dear NTRF Member

INTRODUCING THE NEW FUND ADMINISTRATOR'S MEMBER PORTAL

We are pleased to advise members that the member data transfer has been completed by the Fund's new pension fund administrator, Momentum Retirement Administrators (MRA). This means that the MRA member data portal is available to be utilized by members. We are still setting up the security settings to link the MRA portal to the new NTRF website, but as members are keen to access their values you are encouraged to register with the MRA portal. Once the hyperlink to the portal has been created on the NTRF website, you will be channelled automatically from the NTRF website through to the MRA website. You will however then still have to go through the MRA authentication process if you didn't register on the MRA website, before you can access your values.

The *attached* document is a detailed guide on how to register to gain access to your fund values on the MRA member portal.

It is particularly exciting that the Fund now has a fully integrated system and member data will be available by the middle of each month (as soon as all payments have been reconciled and the reports from the Fund's external Investment Managers have been incorporated).

IMPORTANT: do not use the previous administrator's website (Alexander Forbes) to check your member values. The Fund cannot take responsibility for incorrect information that may be on that website.
