

Long Term Capital Portfolio

July 2018

Investment objective

The Long Term Capital Portfolio is a market related portfolio that aims to provide a return that exceeds headline inflation by 5% per annum net of investment manager fees over measurement periods of at least 7 years.

The portfolio is most suitable for members that have a long investment horizon (7 years or more) and who are concerned about managing inflation risk. As reflected below in the asset allocation, the portfolio has a significant exposure to South African and global equity markets and thus large negative and positive returns are possible, particularly over short periods.

Long Term Investment Performance (net of all investment costs and net of retirement fund tax that applied up to 31 July 2007)

The graph below shows the cumulative value on 31 July 2018 of R100 invested in the Long Term Capital Portfolio on 1 July 2006 (the inception date of the portfolio), compared to how the same R100 would have increased on account of headline inflation and the long term target of inflation plus 5%.

Actual portfolio over 12 yrs, 7 mths = R421.50
 Inflation plus 5% p.a. over 12 yrs, 7 mths = R371.11
 Inflation over 12 yrs, 7 mths = R209.89

The portfolio has delivered a return of 12.1% p.a. since inception (151 months) compared to an inflation rate of 6.1% p.a. over the same period (i.e. 6.0% p.a. ahead of inflation) which is in excess of the performance target of inflation plus 5%.

Total Expense Ratio (TER): Manager fees, including an estimate in respect of trading and administration costs amounts, 0.77% per annum. Please note that this does not include any performance fee payable to some managers should they outperform their performance target. This fee is about 40% of that which the member would pay in the retail savings market.

Stable Portfolio

July 2018

Investment objective

The primary objective of this Portfolio is to deliver a return that exceeds headline inflation by 3% per annum net of investment manager fees over measurement periods of 3 years and to limit the extent of capital losses over 12 months. The Stable Portfolio maintains a much lower exposure to equities compared to the Long Term Capital Portfolio and a correspondingly higher exposure to cash type investments as well as higher yield grade credit (with effect from July 2010). The portfolio is suitable for members that want some participation when equity markets go up, but who are also concerned about losing capital over shorter periods closer to retirement.

Money Market Portfolio

July 2018

Investment objective

The Money Market Portfolio aims to provide a return of 1% per annum in excess of headline inflation net of investment manager fees over measurement periods of at least one year.

This portfolio (which amounts to R 816 million) is invested entirely in cash (60%) and enhanced cash (40%) strategies and is expected to provide a return broadly similar to that of the money market (i.e. the portfolio targets positive returns and very low risk of losing money over any 12 month period which is suitable for members close to retirement).

Long Term Investment Performance (net of all investment costs and net of retirement fund tax that applied up to 31 July 2007)

The graph below shows the cumulative value on 31 July 2018 of R100 invested in the Money Market Portfolio on 1 July 2006 (the inception date of the portfolio), compared to the extent to which the same R100 would have increased on account of headline inflation and the long term target of inflation plus 1%.

Actual portfolio over 12 yrs, 7 mths = R269.05
 Inflation plus 1% p.a. over 12 yrs, 7 mths = R236.33
 Inflation over 12 yrs, 7 mths = R209.89

The portfolio has delivered a return of 8.2% p.a. since inception (151 months) compared to an inflation rate of 6.1% p.a. over the same period (i.e. a real return of 2.1% p.a.) which is an excellent outcome.

Total Expense Ratio (TER): Manager fees, including an estimate in respect of trading and administration costs amounts, 0.25% per annum. This fee is about 40% of that which the member would pay in the retail savings market.
