## RETIREMENT

**4<sup>th</sup> NOVEMBER 2024**

Presented by the Principal  
Officer's Office

## Agenda

- > Understanding your options at retirement
- > Access to the tools on the website
- > How to use the NTRF retirement tools

## What are my options at retirement?

Consider lump sum cash at retirement.

*Consider the issue of a Life annuity vs a Living annuity.*

*Consider the issue of In Fund annuity vs an out of Fund annuity.*

## CASH AT RETIREMENT

- Members have the option to select a cash lump sum at retirement, as follows:
  - Vested Pot : up to 1/3<sup>rd</sup> of the balance
  - Savings Pot : the entire balance
  - Retirement Pot : Nil.
- The cash will be taxed as per the retirement tax table, but remember that SARS allows for any previous lump sum cash payouts.

## TAX ON CASH AT RETIREMENT

1 – 550 000	0% of taxable income
550 001 – 770 000	18% of taxable income above 550 000
770 001 – 1 155 000	39 600 + 27% of taxable income above 770 000
1 155 001 and above	143 550 + 36% of taxable income above 1 155 000

Note : Previous retirement lump sums are taken into account.

## WHAT IS A LIFE ANNUITY?

- The annuity is defined in the contract and is guaranteed by the insurer. The insurer carries the investment risk and also the longevity risk.
- The annuity increases are defined in the contract , and may have no increases, fixed percentage increases, increases linked to inflation or increases linked to bonus declarations from the insurer.
- Any guarantees, spouses benefits or payments on your death would be defined in the contract.
- The initial pension will be determined by the contractual issues such as the rate of increase and any guarantees. For example, the higher the rate of increases, the lower the initial pension.
- On death of the member the benefit due to beneficiaries is generally limited to the balance of the guaranteed period defined in the contract.
- Generally, once a life annuity has been purchased there is limited flexibility to amend the contract.

## WHAT IS A LIVING ANNUITY?

- A Living annuity links the annuity to underlying investment portfolios.
- The annuity is not guaranteed and is reviewed each year. The drawdown must be between 2.5% and 17.5% of the capital at the start of the year, and thus can reduce on the annual review
- The annuitant assumes the investment risk and the longevity risk.
- Dependent on the rate of “drawdown” and the investment return earned, the monthly payments could exhaust the capital and the annuity will cease at that point.
- On the death of the member the beneficiaries receive the remaining asset value.
- The product structure does allow for considerable flexibility

## IN FUND OPTIONS

- You remain a member of the Fund.
- The Fund “purchases” an annuity which provides you with the monthly benefits
- You are limited to the options approved by the Board of Trustees.

## OUT OF FUND OPTIONS

- You purchase an annuity from a registered service provider.
- You provide the Fund with the details and they transfer your retirement savings to purchase the annuity.
- This provides access to a wider range of solutions but often at higher costs.
- The member will exit the Fund and the Fund has no further obligations to that member.
- Members will agree terms and conditions with the insurer and fees are likely to be those applicable to an individual investor.

## WHAT ARE THE IN FUND OPTIONS?

The Fund provides members with two retirement options, namely an in-Fund Life Annuity and an in-Fund Living Annuity. Alternatively, you may select a combination of the two if you comply with the minimum limit for so doing.

Cash option available in terms of legislation.

Minimum limit referred to above is currently R1.5 million (after any cash payment) minimum investment if you select a Living Annuity.

You can elect to defer your retirement from the Fund, and provide your retirement election at the point when you are ready. No further contributions can be accepted though.

## CONDITIONAL RETIREMENT MEMBERS

- Certain members have conditional retirement benefits
- These members are not allowed to opt out of the lifestage investment model.
- The impact of their conditional retirement determines whether their retirement / capital sum will be higher than the current member share. This is calculated by the actuaries and will be enhanced if necessary.
- Other than the possible enhancement to the capital sum, the options at retirement remain the same as for other members (as outlined in this presentation).

## IN FUND LIFE ANNUITY

This type of monthly annuity is **payable for the rest of your life and includes a provision for your surviving spouse.**

Upon your death, 100% of your annuity at date of death will be paid to your surviving spouse for the balance of the first five years from date of retirement, reducing at that point to 75% for the rest of his/her life, provided that your spouse was registered with the Fund as your spouse at your date of retirement.

**Any amount** remaining in your member share account (after deduction of the pension payments and lump sum payments made at your retirement) passes to your spouse on your death. When he or she dies, the balance left in the account will be paid to your **beneficiaries.**

**IMPORTANT** Beneficiaries can be traced only if your Expression of wishes form is kept up to date throughout your retirement.

## IN FUND LIFE ANNUITY contd

Monthly pensions payable may be increased from time to time, based on affordability and at a rate determined by the Fund's actuary and approved by the Board. Once a pension increase is granted, the new higher level of pension becomes payable for the life of the pensioner/spouse.

The monthly In-Fund Life Annuity pension already budgets for an investment return. It can therefore afford pension increases only to the extent that the Fund can earn an investment return in excess of that budgeted return.

## IN FUND LIFE ANNUITY contd

The NTRF two options aims to target pension increases of either 65% or 100% of inflation – this is not guaranteed though. Historically the level of pension increases exceeded the target to inflation because investment returns have been very good, making such increases affordable.

The differential in the starting pensions between the two options is about 25% and the motivation for taking the lower starting pension would be that it provides for higher pension increases which are needed as you age. It also reduces the chances of receiving very low pension increases which can cause hardship in retirement. It is important to analyse your current and future needs when deciding between these two options.

## IN FUND LIFE ANNUITY contd

In addition, a lump sum of R5 000 is payable on the death of the principal annuitant. This is to cover immediate expenses.

Also:

- An alternative 0% spouse's pension, subject to the written consent of the spouse, which may be elected by a retiree on retirement, as an alternative to the default 75% spouse's pension.
- An alternative 20 year guarantee which may be elected by a retiree on retirement, as an alternative to the default period of 5 years.

## IN FUND LIVING ANNUITY

### Investment of assets

At retirement, your money will be invested in your Living Annuity Capital Account that will comprise the investment return earned on the balance in your account after deducting investment management expenses (*this return could be negative from time to time*); **less** the monthly benefit paid to you; **less** the administration and other operational expenses.

You must decide how to invest your Living Annuity (see next slide). If you do not exercise a choice the Board's default selection will be applied.

## IN FUND LIVING ANNUITY contd

## IN FUND LIVING ANNUITY contd

### Member investment choice

Alternatively, you may invest your retirement capital in one or more of the existing **investment channels** offered to in-service members. The same conditions will apply to these portfolios as for in-service members. **You are permitted to change this selection only once per annum on your anniversary date – i.e. end of the month in which you retired.**

The investment portfolios are:

- Long term Capital portfolio
- Stable Portfolio
- Money Market portfolio
- Shari'ah portfolio

## IN FUND LIVING ANNUITY contd

### Death of the member

- After **you** have passed away, your surviving spouse will take over your account and continue to “draw down” on the account as per his/her choice, provided you have nominated your spouse to continue to receive this living annuity. If no spouse is nominated, the benefit will be allocated in terms of section 37C of the Pension Funds Act.
- Subject to provisions in the Income Tax Act, your spouse may commute the full benefit (not part of it) within six (6) months of your death.
- After your nominated spouse has passed away, the balance in his/her Living Annuity Capital Account will be distributed in accordance with the completed Expression of wishes form on file and not in terms of section 37C of the Pension Funds Act. If no nomination is made, the benefit will be paid to the estate.

## IN FUND LIVING ANNUITY contd

### Monthly annuity

You may select a draw-down lower than that stipulated in the table below:

Age at anniversary date	Maximum "draw-down"
Up to age 60	5%
61 - 65	6%
66 - 70	7%
71 - 75	8%
76 - 80	10%
81 - 85	12%
86 - 90	14%
91 and older	17.5%

## OUT OF FUND OPTIONS : LIFE ANNUITY

Access to

- other guaranteed periods
- other spouses pension percentages
- Other approaches to pension increases

## OUT OF FUND OPTIONS : LIVING ANNUITY

Access to a wider range of investment options

The Pension Funds Act specifies a minimum “draw-down” of 2,5% per annum and a maximum of 17,5% per annum.

## KEY DECISIONS

- How much to be withdrawn as a taxable cash lump sum?
- How much to purchase a life and / or living annuity?
- Choice of service provider and structure of annuity?
- Whether to defer financial retirement?

## ACCESS TO THE NTRF PORTAL AND RETIREMENT TOOLS

- Presentation by Jaco Wasserfal
